

## MPCX47

The vehicle computer system with GPS/GSM option

This totally silent DIGITAL-LOGIC vehicle computer operates on the basis of the Intel® Pentium® M with passive cooling. The main focus is on in-vehicle installation, protection from moisture, vibration and extreme temperatures, replaceable storage media such as hard drive/CompactFlash (media packs) and different types of replicator (connecting technology). Galvanically isolated inputs and outputs and analogue measuring inputs are available for control purposes. Up to 2 different displays can be output via 3 video interfaces (DVI, VGA, LVDS). The MPCX47 can be used together with an in-vehicle display system DV monitor (6.5-12"). Simple operating software for operating all device-internal functions via the touch screen of the DV monitor is optionally available.

### Applications:

- \_ Specially developed for in-vehicle installation
- \_ Measuring computer for vehicle testing
- \_ Communication computer with internal GSM, WLAN, LAN and GPS
- \_ All-weather (outdoor) use
