

800TSV 8" Touchscreen LCD LED Monitor w/ VGA & AV Inputs

Description

Xenarc Technologies Corp. introduced its 800 series line of ruggedized, aluminum encased displays with an 8" LED LCD Touchscreen with VGA input, utilizing the latest LED Backlight technology.

This rugged and versatile product incorporates the innovation of our VGA 8" model along with a 5-wire resistive Touch-Screen panel. Use the convenient touch-screen as your input device, control your mouse cursor or the mini on screen keyboard that comes with your operating system. The touch screen utilizes the USB port as the interface. You can connect several of our touchscreen displays to your computer and the touchscreens would work simultaneously through the multi-monitor support.

The brushed, anodized aluminum face plate gives the monitor a modern yet elegant look. The entire enclosure is constructed with aluminum, making the unit strong and ruggedized.

Why do our products outlast others at extreme environments? Why do our products have wider temperature range and wider voltage input range? It is because our mission is to offer our customers the best. By utilizing high grade components, this monitor is perfect for industrial, in-car computing applications or any other applications where a small, durable display is required.
