| Power Consumption | ≤8W |
| Size(LWD) | 212mm×146mm×40mm |
| Weight | 766g |

8. TROUBLE SHOOTING

1. Only black-and-white image:
Check the level of color saturation and brightness is proper.
2. Power on but no picture:
Make sure the PC、DVI、VIDEO、HDMI cable is tightly connected exactly correctly Make sure you are using the standard power adapter coming with the monitor.
3. Wrong or abnormal colors:
If any color is missing, check the cables to make sure it is securely connected. Broken or loose pins in the cable connector can cause a bad connection.
4. Remote control doesn't work:
Check the battery to make sure the battery is installed properly and make sure it is not a low battery. The signal is interfered by some obstructions.
5. When on the picture shows size error:
Long press “MENU” to zoom in/out pictures automatically when receiving HDMI (High-Definition Multimedia Interface) signals.
6. If any abnormal matters happened, pls enter “MENU” choose  to reset
7. If it can't be touch, pls check the USB connect exactly correct or not, or install the correct touch driver as per the PC OS?

9. REMARK:

- If interruptive image occurs, it maybe that the VGA signal frequency isn't matched with normal standard.
- It is a normal condition that some bright lines appear on the screen when you turn the unit.

Note: due to constant effort to improve products and product features, specifications may change without notice.
