

703TSP 7" Sunlight Readable Touchscreen LED Display w/ HDMI & Displayport Inputs

Description

Xenarc Technologies Corp. is one of the first display manufacturers to introduce a 7" LED screen with DisplayPort and HDMI inputs. By utilizing a LED panel with native resolution of 1024x600, this monitor is the highest resolution 7" LED monitor on the market. The unit incorporates our latest LED backlight technology for a brightness rating of 1,000NIT for excellent sunlight readability. In addition, Solid Capacitors are used though out the unit for improved stability and durability especially in extreme temperature conditions.

This popular product incorporates a 5-wire resistive Touch-Screen panel. Use the convenient touch-screen as your input device, control your mouse cursor or the mini on screen keyboard that comes with your operating system. The touch screen utilizes the USB port as the interface. You can connect several 703TSP monitors to your computer and the touchscreens would work simultaneously through the multi-monitor support.
